

DIDSBURY PIONEER

VOL. XXX, N

DIDSBURY, ALBERTA, THURSDAY, SEPTEMBER 18, 1933

\$2.00 per Year. 5 cents a copy

Golden Wedding Anniversary.

A very pleasant surprise was given Mr. and Mrs. M. B. Clemens on Thursday evening last, September 21st, when a host of friends and members of Zion Evangelical Church called to offer their congratulations on the celebration of the Clemens' golden wedding.

An enjoyable program was given, with Rev. H. J. Wood as chairman. Short addresses were given by Messrs. F. Spies, Ed. Boettger, J. V. Berscht and H. M. Reiber; solos by Messrs. Geo. Liesemer and Harry Gabel, and a solo by Mrs. H. J. Wood. A reading by Mrs. Berscht, with a solo from Mrs. Wood, and a meek wedding featuring Mrs. Gabel as minister, Miss Edna Thaler as groom, Miss Alice Rennie as bride and Lois Cunningham as flower girl, caused gales of mirth to fill the room. Rev. Wood read the presentation address, after which Mr. and Mrs. Clemens were presented with a purse of gold. A good old song was enjoyed, and a bounteous lunch brought to a close a most enjoyable evening.

The family gathering and celebration was held on Sunday, September 24th, when Harold, of Edmonton, and Edith, of Calgary, sons of Mr. and Mrs. Clemens were able to be home. One daughter, Mrs. J. W. Halton, of Didsbury, was present. Two daughters, Mrs. M. M. Uterback, of Chelan, Washington, and Mrs. Chas. Ratcliffe, of Kimberley, B.C., and one son, Roy, of Baynes Lake, B.C., were unable to come for the occasion. Other relatives and friends present were Mr. and Mrs. A. O. Fisher, Mr. and Mrs. Larry Leavens, all of Didsbury; Mrs. Henry Weber, of Calgary; Mrs. Harold Clemens and daughter Jean, of Edmonton, and Mr. J. W. Halton of Didsbury.

Following a sumptuous dinner, music was enjoyed. On behalf of the family Harold Clemens presented his parents with a purse of gold. Other lovely gifts were bestowed. The remainder of the evening was spent in singing and musical selections.

The marriage of Milo Bowman Clemens to Susanah Zeller took place at Breslau, Ont. in 1883. They lived in Rochester, N.Y. for eight years, coming to Western Canada in April of 1901 and settled on a farm west of Carstairs, Alberta. In 1908 Mr. Clemens built a home at Didsbury and he and Mrs. Clem-

Christian Endeavor Elects Officers

The senior Christian Endeavor Society of Zion Evangelical Church held its annual meeting on Monday evening September 18th, when the following officers were elected for the year:

President, Miss L. Wrigglesworth; Vice-president, Leonard Berscht; Rec. Sec., Miss B. Wrigglesworth; Correspond. Sec., Miss R. Gabel; Treasurer, Goldwin Gabel. Chairmen were appointed for the following committees: Worship, Miss L. Wrigglesworth; Lookout, Leonard Berscht; Social, Aylmer McEwen; Lunch, Miss Helen Moon; Quiet Hour and Bible Study, Miss Wilma Liesemer; Sympathy and Service, Mrs. Wood; Missions, Miss Hazel Hall; Christian Citizenship, Gordon Boettger. The treasurer reported the total receipts for the year as \$68.48, and total expenditures as \$63.66, balance on hand \$4.82.

Go To University.

Didsbury district will be well represented at the University of Alberta this next year. Messrs. Elmer Evans and George Hawkes returned to the University to continue their studies, and new students from the district are Miss Connie Hoesgood and Messrs. Ormond Phillipson and Tom Clarke.

BIRTHS

September 23, 1933, at Didsbury Hospital to Mr. and Mrs. L. Steller a daughter.

September 15, 1933, to Mr. and Mrs. Gordon Sherrie a son.

One has since resided in this town. Mr. and Mrs. Clemens are two of the most respected oldtimers in this district, and their many friends offer every good wish for a continued happy life together.

Mr. Clemens will be 73 years old in October, while Mrs. Clemens will be 72 in November. There are three sons and three daughters living. One son, Clare, died in infancy. There are fourteen grandchildren.

LOCAL & GENERAL

Mrs. Mitchell, who has been visiting her daughter in Calgary for the past week, returned home Tuesday.

Mrs. Frank Mortimer (nee Lydia Knudsvig), of Calgary, spent last week with Mrs. John Finery.

Mrs. W. W. Gillie, who underwent an operation at the Hospital, was able to return home last week-end.

Posters are out advertising Ranton's Big Fall Sale. Mr. Ranton states that wholesale prices have advanced since he purchased the stock for this sale, but he is giving the public the benefit of the low prices.

Mr. W. J. McCoy, who is engaged travelling highway in the Turner Valley district, visited his home during the week-end.

Jim McGhee and John Fleury were the lucky hunters this week. Each bagged a goose. They say they got them out east, but we could not learn the exact location. Guess the boys are going out again.

Geo. Julien and Charlie Mortimer had a very successful shoot Saturday afternoon. They came back with their limit of duck and a nice bag of Huns. The editor appreciated the couple of duck they handed to him.

The prizetier for the 29th annual fall stock show and sale to be held in Calgary November 1st to 3rd, has just come to hand. Copies of the prizetier and full particulars can be had from Mr. E. L. Richardson, Exhibition Buildings, Calgary.

A baby Austin was crushed in the streets of Didsbury on Saturday p.m. The baby was parked in close proximity to a truck. In backing out the truck crashed into the wee fellow crushing the latter's fender and breaking a wheel. The baby was taken to Stevens' Garage for repairs.

Mrs. S. Janesack and family, who have been visiting the former's sister Mrs. A. Melne, left last weekend to join her husband at Lacombe, where he has been working for the past four months. Mrs. Melne accompanied Mrs. Janesack and will spend a few days at Lacombe.

Mr. A. Speakman, M.P. will address the members of the Canadian Legion at their regular meeting this Saturday evening, September 30th. He will have matters of interest to discuss with the returned men and a full attendance is expected. The meeting will commence at 9 o'clock and nomination of officers for the ensuing term will take place.

Fourteen Cars of Grain In One Day

The movement of grain has reached larger proportions than usual this fall, and according to Mr. J. A. Mettlee, the shipments have been heavier so far this fall than in usual.

On Monday last fourteen carloads left the yards here and all elevators and loading platforms are kept busy.

Start New Class.

The band practices so far have been very successful and the boys are progressing very well. So many new boys are anxious to join the band that it has been decided to start another class about October 10. Any boy desirous of entering the new class should see Mr. Ford or Dr. Liesemer.

Hunters Can Bag Prairie Chicken After October 1

Hunters south of the Lacombe-Kerbert branch of the C.P.R. and the Red Deer river, will be able to shoot sharp-shinned grouse, known as prairie-chickens, after October 1st.

As October 1st falls on a Sunday, the season will start the following Monday and continue until one week from the next Saturday—a period of 12 days. The bag limit is 5 a day and 25 for the season.

Changing Civilization. The State. And The School

Prevailing economic conditions throughout the world have had a direct and calamitous effect on Canada, and particularly on the entire western half of the Dominion which has to depend so largely upon world markets for the profitable disposal of its products. The situation thus created was bad enough for the people at large, but, unfortunately, it was intensified throughout very large areas by successive years of drought and insect pests resulting in almost if not quite complete crop failure. Many people would have been able to fairly well contend against one of these adverse conditions, but were swamped by a combination of the two.

The result has, of necessity, been not only a loss of income and livelihood to thousands of individuals, because the losses in the agricultural world has brought unemployment and loss in the industrial world, but it has thrown a very heavy burden on all governments, while at the same time greatly reducing their revenues whereby to meet that burden. People without incomes cannot, of course, pay taxes. Public services have had to be cut, and various economies enforced.

Canada, as a nation, and the Western Provinces in particular, have always been generous in making provision for the education of the youth of the land. They have been proud of their educational systems. They have never been backward in giving whole-hearted support to the improvement of education for their children and increasing the means of obtaining it by all. As a result, expenditures for education have been heavy, and school taxes high.

Owing to the necessity of cutting public expenditures in these times, some people have advocated a slashing of expenditures on education, involving drastic curtailments in the school facilities provided, and limiting the educational opportunities of the present generation. Serious reductions have already taken place, and in particular, teachers' salaries in rural schools have been reduced to a point where it is difficult for them to carry on. Nevertheless some short-sighted, penny-pinching people still clamor for still greater "savings" at the expense of the education of the children of today. To all such we would recommend a careful consideration of the following article contributed to the *Victoria B.C. Times*, inasmuch as the application of the truths contained therein are by no means confined to the Province and people of British Columbia.

With economic conditions as they are we hear on all sides the most fantastic suggestions about closing the schools, doing away with high school education after the age of 14, save for those who can afford to pay fees, about elimination of school services that make for education efficiency, about merciless slashing of teachers' salaries.

"Teach 'em till they are fourteen," said a man of reputed mental brilliance to me the other day. "Teach 'em till they are fourteen, then let them go—unless their parents can afford to pay for them to go in for higher education."

"Let them go?" But where? In Vancouver alone 40,000 children are attending school. What if 4,000, 5,000 of them were turned out of the schools? Were not able to go back this year? And probably as many more throughout the province?

Twenty years ago such children might have been absorbed in unprosperous labor of some kind, in apprenticeship, in farm work (though not in British Columbia this last).

What is there for them to do now? What?

And as every mother, every teacher knows, fourteen is a dangerous age. Britain has not passed a petty bad law these last ten years, but she has not cut her school services. As a matter of fact she has increased them. She knows she had to.

It seems to me if any of these drastic curtailments suggested by reactionaries are done away in tentative moderation and as temporary expedients, a Dark Age will set in.

Of course, the highest work in the intellectual world always seems to be beyond the range of intelligence of the majority of people. A nation's rank in the world may be estimated as high or low by the amount it allows itself for the higher kinds of work that is for its teachers, its clergy, its inventors, its social service workers, its creators of all kinds of art. Take the nations and see how they measure up in your estimation in this respect.

If a nation wants able men and women to deal with and teach its children, it must pay for ability.

A mean demand will meet with a mean supply.

And the nation in the long run will be the loser.

Canada cannot afford to lose in this matter of education. Children of the changing civilization, for changing it is and very rapidly in form and ideals—cannot afford to lose. We, the adults of this generation, have no right to steal from the future generation anything in the matter of educational opportunities or wisdom.

Young Canada are stand on guard for their? was the apt and international misquotation used by Dean D. Buchanan in his address to the British Columbia Teachers' Federation, in convention. It tersely sums up the attitude of teachers and parents during this time of economic stress.

Weakening Diarrhoea Dangerous Dysentery

Diarrhoea and Dysentery do not need to run for any length of time until the whole system is weakened and debilitated. Few other diseases so quickly undermine the strength and bring about a condition of prostration and often collapse.

Dr. Fowler's Extract of Wild Strawberry is not only prompt and effective in checking the looseness of the bowels, but at the same time it strengthens, stimulates and braces up the system.

Never be without a bottle of Dr. Fowler's. Always be prepared in case of emergency.

Free-Handness Of Patrons Means Terrible Loss To Railways and Hotels

How many towels are, let us say, appropriated by railway passengers? The figures for English trains are staggering, an English railway detective being authority for the statement that 25,000 towels were taken from the trains of one system last month. He says also that the thefts of cups, spoons, window straps and glasses cause a loss to British railway companies of thousands of pounds a year. Most of these disappearances occur in the summer holiday season. Hotels and restaurants, on the other hand, sustain their heaviest losses at Christmas, when glasses, jugs, ashtrays, cutlery and linen vanish by wholesale. According to an English hotel-keeper, the practice of picking up useful or fancy little articles is more frequent among well-to-do people than among the less fortunate. There is an aspect of this interesting custom which is not often thought of, namely, that the necessity of not offering a good customer when mischance has revealed his free-handness with mine host's property. Some years ago a valued guest, having paid her bill, was making her way to the door of the hotel when one of the hotel's apprentices clattered to the floor. An attendant promptly picked it up and hastened after her, with the obvious intention of handing it to her as if it had been her own, but his well-meant effort to save the hotel's face was foiled by an acceleration in her speed which almost turned it into flight. The attendant's fears were realized. She never stayed at that hotel again—New York Evening Post.

Doing Good Business With Other Countries

Japan Rapidly Forging Ahead Opinion Of British Shipowner

"The thing that impressed most on my five months' tour of the world was the way Japan is forging ahead in her business with other countries, and the way she is leaving us far behind," stated J. S. Dalgleish, British shipowner of Newcastle-on-Tyne, who reached Victoria recently from Australia. He spent several days at Vancouver before crossing the continent en route to England to complete a trip around the world. "Japan has knocked Great Britain and the United States flat," Mr. Dalgleish declared, "and the money we wake up to that fact the better for us all. Our costs are too high, and the sooner we get rid of tariffs, subsidies, restrictions and quotas the better."

Can Do Seventy Miles

Manitoba Police Using Midget Car For Highway Patrol Work

Two six-wheeled Manitoba patrolmen arrived at Calgary on business, driving a motor car which makes a baby Austin look big in comparison. The midget auto was imported from England for highway patrol work. The two men stated tiny cars and big cops form an ideal combination for the job.

Both men are employed by the Manitoba Motor League Safety Patrol, and have authority to lay information and make arrests in connection with infractions of the Motor Vehicle Act of that province. They stated that their little car can make 70 miles an hour, even on gravel highways.

Fingerprints Are Valuable

Worth Far More Than Photographs In Many Cases

Fingerprints as well as photographs should have their place in the family album. Police Commissioner Austin Roche, Buffalo, N.Y., told the annual convention of the international association of chiefs of police at Chicago.

"These prints," said Roche, "would be of great value in cases of missing persons or kidnapping. They would be worth far more than photographs in many cases."

Roche suggested the fingerprints be taken of a person as a child, thus assuring him his identity would be preserved as long as he retained his hands.

A "tradium check" is used to find the age of the teeth. Erosion of the tooth and salt is also an "age gauge."

Established New Record

French Artist Crossed Atlantic Alone In Six-Foot Sloop

Claiming a record for a one man crossing of the Atlantic under sail, Martin-Marie, French seascaper painter, whose real name is Durand Coupat, arrived at New York August 24, aboard the thirty-six-foot sloop "Winnibell II," which he navigated single-handed from Brest.

Coming by way of Madeira, Dominica, and Port de France, Martin-Marie has covered 2,850 miles since May 10. The famous Captain Slocum, in the equally famous "Spray," set the previous record mark, with a crossing from Cape Sable to Lisbon in twenty-eight days.

Marie took twenty-nine, but in that time he covered 250 miles more than the earliest mariner.

The "Winnibell" was launched at Boudigues in February, and it has several devices permitting navigation by a one-man crew. The sloop can be steered from the cabin. All the halyards run aft through leading blocks. A cover can be placed over the cockpit, and the "Winnibell" completely closed up, with her pilot inside.

Marie's purpose was to gather material for his seascapes. During the voyage to Martinique, he said, he took over the tiller only thirty-seven hours. For twenty-seven days he did not touch the helm. En route from Martinique to New York, he steered only three days. When the boat was at the helm, he could go below and sleep for hours or toll on deck in good weather as much as he pleased, confident that his sloop was on its course.

Like Canadian West

Lord and Lady MacMillan Hope To Return For Longer Visit

Lady MacMillan, whose distinguished husband heads the Royal Commission on Banking in Canada, likes the Canadian West and hopes to return for a lengthier visit soon. "We've been to Canada four times, but we've had only the most tantalizing short glimpses of the Rockies and the Prairies," she said. "Some day we hope to return for a real holiday and seek some of the far away mountain trails that appeal to us so much."

In 1926, Lord and Lady Macmillan were in Saint John for the meeting of the Canadian Bar Association; in 1928, they visited Regina for the Bar convention when Lord Macmillan represented Britain at that gathering.

The Macmillans hold a distinct opinion for Lady Macmillan, who is keenly interested in the Scottish people in Canada. "We are Scottish, you know, not English," she said.

While in Victoria, Lady Macmillan secured some flower seeds from the Butchart gardens for their country estate in Surrey.

Veteran Engine Scrapped

Locomotive No. 2717 Only British Engine Captured By Germans

A battle-scarred British war veteran and ex-German prisoner of war, with a travel record of more than 1,220,000 miles, has just passed away. "This" was locomotive No. 2717, believed to have been the only British railway engine to have been captured by the Germans. It has just been withdrawn from service and broken up.

While in use on the British front at Cambrai in 1917, No. 2717 was captured by the enemy and for five months was used as a machine gun post in "No Man's Land." Following the March retreat the Germans removed the engine, patched up the bullet and shrapnel holes and used her for railway service until she was recaptured by the British in Belgium.

On return to home duties after the war the engine was decorated with a plate recording its war services.

Queen Receives Degree

When the degree of Doctor of Music honor of the Royal College of Music was conferred upon the queen, her majesty received from the Prince of Wales a jewel and chain as a gift from the college, of which he is president. The degree was conferred at Buckingham Palace by Sir Hugh Allen, director of the college; Lord Palmer, vice-president, and Charles Morley, honorary secretary.

Honestly is the best in the long run. But, on the other hand, if you are honest you do not have to run.

Financial Strength Of Britain

Deposits In One Bank Increased \$750,000,000 In Year

There is a striking indication of the financial strength of Britain in the matter of the saving of money by Britshers, contained in the annual report of a leading bank, one of the Big Five. The deposits compared with last year show a clear gain of \$750,000,000.

The general prosperity of the institution was shown in the maintenance of three classes of dividends, one of 10 per cent, the others of 14 per cent, each.

With total resources approximating two billions of dollars, there is summoned up a satisfactory money prospect of capacity to finance enterprises under a widening market, such as was hoped for by the action of the Economic Conference, that is most reassuring.

The increased savings on deposit tell the story of latent financial reserves in England. This is fortified by the statement of the large dividends earned, and paid—Winnipeg Tribune.

Soured ON THE WORLD?—THAT'S LIVER

Wake up your Liver Bile

No Calomel necessary
Many people who feel sour, sluggish and generally unwell make the mistake of taking salts, or mineral water, believing easily that this will "give the liver" and "cleanse the bowels and give the liver." While this may give you a temporary lull, it starts your liver pouring the daily two to four ounces of bile down your bowels, and instead of working as they should, they become inflamed.

Carter's Little Liver Pills will soon set you on a purely vegetable basis. Ask for them by name. Refuse substitutes. See at all drug stores.

Television Tests From Crystal Palace Tower

Commanding Height Far Above Thames Makes Place Ideal

Negotiations have just been completed to permit experimental television transmissions from the south tower of Crystal Palace.

The transmissions will be made for the first time, on ultra short waves below eight metres.

This tower is regarded as ideal because of its commanding height. It stands 550 feet above the Thames level.

Recently H. Thomas, the assistant organist of Crystal Palace, a wireless expert, carried out experiments from the north tower with his amateur transmitter (450mc), using a five-metre wave.

Reports of successful reception came from various parts of the country, some 200 miles away.

Statesman From Antipodes Issues Grave Warning Respecting Building of Warships On Pacific

Hon. William Downie Stewart, M.P., former minister of finance in the New Zealand Government, the statesman who negotiated the trade treaties between New Zealand and Australia, Canada, Japan and Belgium, startled members of the Institute of Pacific Relations by declaring the institute might well have taken up as a subject for discussion the present feverish building of battleships by great nations on both sides of the Pacific. His view was that if causes of friction were to be studied, building of war fleets could not properly be ignored. This should be done before serious events occur, he said.

"I am not a pessimist," he exclaimed towards the conclusion of his vigorous speech delivered from his wheel chair, for he is permanently crippled. "It may be a fatalistic view as I realize if certain factors are at work they will produce a certain result unless a solution is found."

"When I see on both sides of the Pacific great nations feverishly building battleships, armadas manœuvring, I am bound to ask myself what for. If you build a mill it wants grist."

"There is no peace machinery in the position," he continued, "and so the position seems to me grave and serious, disturbing and menacing. I will say if you talk war you'll get war. And also it is futile to cry peace."

Canadians Eating More Pork

Figures For Last Year Show 91.79 Pounds Per Person

Reminiscence of the brave old days when a barrel of pork constituted an ever-ready standby in the pioneer's larder, Canadians in 1932, according to the latest statistics, ate more pork and less beef and eggs than in the preceding three years. In 1932, also, more turkeys, ducks and geese were eaten than in 1931, but less than in 1930 and 1929. Again, in 1932 the consumption of chickens was less than in the preceding year.

reckoned in percentages, every Canadian man, woman and child in 1932 individually consumed 91.79 pounds of pork; 56.02 pounds of beef; 6.97 pounds of mutton; 7.87 pounds of chicken; 1.75 pounds of turkey; .41 of a pound of duck; .83 of a pound of geese; and 28.36 dozen eggs. The estimated total consumption for the last year is: Pork, 964,885,673 pounds; beef, 588,609,857 pounds; mutton, 73,182,356; chicken, 82,658,149 pounds; turkey, 18,423,340 pounds; duck, 4,285,215 pounds; geese, 8,670,600 pounds; and eggs, 297,919,339 dozen. Dominion Department of Agriculture.

Menace To Poultry Stock

Lice Are Greatest Danger To Life Of Baby Chickens

Poultry experts and practical poultrymen recognize the danger to the life of the baby chick if it comes in contact with lice or mites. Prof. J. Holmes Martin, of the University of Kentucky, points out that much of the loss among chicks raised on the farm can be attributed to lice and mites. He says: "The most important single factor in preventing loss from these pests is to free the mother hen and brooding equipment from lice and mites before the chicks hatch."

To rid the flock of lice, Professor Martin suggests the simple treatment of applying Black Leaf 40 to the roosts about one-half hour before roosting time. It should be pointed on top of the roosts with a small paint brush or applied in a thin stream with an oil can. When the birds go to roost fumes are given off which kill the lice while the birds are roosting. It is necessary, of course, in order to get a complete kill that all the birds spend the night on the treated roosts.

Somebody says snobbery is more rampant at flower shows than anywhere else. Haughty culture, no doubt.

W. N. U. 1919

Lesson In Natural History

Fruit Dealer In London Says Wasps Work For Man And

Do you hate wasps? Yes, but what do you know of them? I have received my first serious lesson in natural history writes a Daily Sketch correspondent.

Hyde Park is swarming with caterpillars, and Arthur, the 70-year-old chair attendant, informed me that he had been waging war against them for the past 30 years. This waste of time annoys Lisa, who spends her days retelling fruit at a spot near the Marble Arch entrance.

"Serves 'em right," she informed me. "Serves everybody right who owns 'de Park for killing all the wasps like they does." She has an idea that wasps are the natural exterminators of caterpillars.

"To think 'ow they're treated nowadays," she said, with a shake of her head. "I allus ses to everybody, 'Don't be too 'ard on 'em, for if it wasn't for the wasps there would be no fruit,' although I own they be a bit of a nuisance when they commence to crawl."

"They don't sting unless they're provoked. Why, if it weren't for the wasps a working and all May you wouldn't get a strawberry, let alone a fruit 'arvest. Wasps be useful if they're let alone, and they do good work."

"I well remembers the time," she went on somewhat dreamily, "when me uncle in the country used to count on the wasps to keep down the grubs and insects, let alone the flies. Think of the hundreds of midges they can swallow at a stretch."

"On some fruit trees and bushes the leaves be all curled back in a most curious manner. The farmers and gardeners call it 'blight,' but if they wasn't so fond of killing the wasps there wouldn't be so much blight, and the farmers and market gardeners can't do for their crops what the wasps can do. It's only since the farmers and the market gardeners 'ave 'unted the wasps and used insect-killers that there's been so much blight."

Magazines For McGill

About 3,500 Received Regularly By Montreal University

McGill University, Montreal, is one of the largest subscribers of periodicals in the world. Statistics compiled show that the university regularly receives some 3,500 magazines. Some 2,000 of these are subscribed for in the regular way, a total of 930 are presentation subscriptions, while 560 are on the exchange list with other institutions. The entire collection has been rated one of the best in the world by visiting librarians.

Constructed a century ago, the front of the British Museum, London, England, has been cleaned for the first time, only soap and water being used.

EMBRACING HINDUISM FOR LOVE

A dramatic moment at Chalk Farm, London, as Miss Jessie Womack Medley, an English girl, was received into the Hindu faith. At the left is G. R. Patkar, son of a Hindu millionaire, whom she married a year ago. At the right is Dr. Moonge, president of the Hindu Maha Sabha, who performed the ritual that made the girl a full-caste Hindu.

Forest Nursery Stations Show What Can Be Accomplished In Reforestation Of The West

The scheme under which trees are supplied by the Dominion government for prairie farm planting in Manitoba, Saskatchewan and Alberta, was first inaugurated in 1901 by the late Hon. Clifford Sifton, who was at that time Minister of the Interior. At that time the general opinion was that trees could not be grown on the prairie and for that reason it was very difficult to interest farmers in this line of work. In January and February of 1901 a large number of farmers' meetings were held in the three provinces, at which the scheme was discussed. Very little enthusiasm, however, was aroused, only some 30 farmers in the three provinces expressed willingness to try out what they considered a very doubtful experiment. These first few plantings were successful and next year there was a larger demand, and 47,000 young trees were supplied to 421 farmers. Neighbors became interested, encouraged by the success of these first plantings. In 1904 1,800,000 plants were furnished to 1020 applicants. From then on the demand increased by leaps and bounds. In 1929, 6,500 applicants received 8,500,000 trees and since that time from 5,000 to 6,000 applicants have been supplied each year.

Up-to-date 133,500,000 trees and cuttings have been sent out from the nurseries, of which 2,500,000 were spruce and pine. The Scotch pine and spruce are the evergreens principally used, and these are sold at a very nominal cost. Next spring the charge for those will be \$2 per hundred. The broad leaf kinds, such as maple, ash, elm, caragana, poplars and willows are supplied free of charge provided the farmers make application before the first of March in the year previous to planting. That is, those wishing now to plant in 1935 must apply before March 1, 1934.

In order to ensure a supply of stock for distribution, two nurseries were established, one at Indian Head, Sask., and the other at Sutherland, Sask. The control of the work is organized at Indian Head where the main office is established.

Until 1930 the tree planting division was a part of the federal forestry branch under the department of the interior, but in the spring of that year, after the natural resources were turned over to the province, the forest service was reorganized and it was decided to transfer the tree planting division to the department of agriculture, so that the nurseries now are part of the experimental farms system. Under Dr. E. S. Archibald, director of experimental farms, at Ottawa,

The results of the work which has been carried out from the Dominion nursery stations during the past 30 years is very evident to any one who familiar with conditions on the prairie farms in the earlier years of development. While conditions, generally, on the prairies are not particularly favorable for tree growth, it has, nevertheless, been conclusively demonstrated that when proper methods are employed, successful plantations are not really difficult to establish. On the prairies where rainfall is limited and climatic conditions extreme, plantations can only be successful when given proper attention. Where trees are neglected, they quickly deteriorate, but the benefits which may be derived from well planned shelter belts are so great that one is well repaid for the comparatively small amount of labor entailed in keeping them in good condition.

The farmer in these times of stress is realizing more and more what it means to have a good garden and fruit plot, which cannot be developed satisfactorily without adequate protection. Perhaps it is on account of the very unsatisfactory farming conditions at the present time that more interest is being shown in tree planting than ever before. Then, too, more interest is being paid to the improvement of the farm home by plantings of ornamental shrubs and flowers. Many who now have established shelter belts are getting very satisfactory results with fruit of various kinds, such as apples, crabapples, plums, hybrid cherries and all varieties of small fruits. Besides affording a very interesting line of work, practically all the fruit required for the farm family can be raised at home and often a very considerable surplus is raised which can readily be disposed of to neighbors at very remunerative prices.

At the Indian Head forestry station the grounds are laid out attractively planted with trees, ornamental shrubs, flowers and lawns and provide an excellent demonstration of what can be accomplished along these lines under prairie conditions. A small area is set aside also in which hardy varieties of apples and other tree fruits are grown, several acres of different kinds of trees in various mixtures, which are of particular interest to those who may have any doubt as to the practicability of growing a home supply of fuel and fencing material. These plantations vary in age from 18 to 21 years furnished over 65 cords of wood last year from trees cut out as thinnings.

Visitors are always welcome and any who are within reasonable distance of either the Indian Head or Sutherland nursery stations, would be well repaid by spending a few hours going over the grounds and plantations.

Danger In The Kitchen

Place Where Large Percentage Of Accidents Occur

The kitchen doesn't ordinarily seem like a dangerous place—except perhaps, when a truly inept cook concealing indigestible dishes is hot and doesn't wish to be disturbed.

But there were 28,000 deaths last year from accidents which took place in the homes of the United States and fully 34 per cent of these occurred in kitchens. Falls and scalds seem to be the most prolific sources of home accidents. And while it is a bit difficult to see just how a safety code can be devised and enforced for the home, a little care and forethought in the midst of the daily round of activities ought to save a good many lives each year. —Chatham News.

An old bachelor says that it is impossible for a woman to do anything better than a man. Evidently he has never seen a woman pack a trunk.

France has one doctor to every 1,696 persons.

Controlled Currency.

Lord MacMillan, chairman of the Royal Banking Commission, speaking in Montreal recently, indicated his trend of thought by stating that the world is moving toward a new monetary era. The idea of controlled currency is being considered throughout the world and will, in his opinion, bring developments that were not even considered a few years ago.

He instanced Sweden as a country which has resorted to a purely managed currency. In that country a basic value relates major commodities and transactions, and relative values are maintained.

Tracing the old adherence to the gold standard, he records the upheavals of 1914 that rocked its domination. First the forced inflation as a consequence of war years, and then a rush back to the old standard. But, he says, "the new wine of post-war finance was too much for the old gold standard bottle, and the crack came in 1931. Today we are surveying the splinters."

"It has been rediscovered that money is not the mainspring—but the pendulum of economic mechanism—and it must be an adjustable pendulum."

Any new gold standard that may be arrived at internationally, must provide for managed currency within participating countries. There will have to be some principle which keeps international trade in fair balance. "Canada," Lord MacMillan says, "will have to consider her relation to other countries and dealings with other countries, as well as considering her own peculiar needs."

This is not regarded as a definite commitment to the central banking idea, but merely a consideration of this as well as other alternatives.

"Kritiks' Korner."

Perhaps a word of explanation is in order as to the purpose of this Kritiks' Korner. Let me say at the outset that it is not intended that it should be merely a fault-finding department. The writer is intensely interested in the welfare of Didsbury, therefore as he goes about from day to day he jots down those things which he observes that in his opinion make this a pleasant and comfortable place in which to live, as well as those things which he feels could and should be improved. He has no personal axe to grind, nor does he harbor any grudge. We will try to be absolutely impartial in our comments in this column, keeping always in our minds our objective to make our surroundings more beautiful and convenient. If at any time our readers have suggestions or criticisms that they feel would be helpful, we would be glad to receive them. Address them to "Kritiks' Korner" care of the Pioneer Office.

The proprietors of the South End Service Garage deserve much credit for the transformation they have wrought upon the old power plant. It just shows what a little paint and effort, coupled with good taste, will do.

The other afternoon when it was raining we had occasion to go down town, and as we walked along we were congratulating ourselves that we had good sidewalks to walk upon and that we could keep our feet dry. —Then we came to a crosswalk and—

Here and There

Taken as a whole the British West Indies as a market for Canadian products ranked tenth last July with \$550,000, with Newfoundland coming next.

Increasing prosperity in Canada and the United States is seen in the early arrival in the Dominion of United States Christmas tree buyers. They are particularly busy in the Maritimes where the demand is especially heavy.

Edward C. Carter, of New York, traveller and publicist, has been chosen to fill the newly-created post of secretary-general of the Institute of Pacific Relations which has just completed its fifth biennial conference at the Banff Springs Hotel.

Eleven happy boys took the eleventh annual "On to Alaska" tour this year under the leadership of George E. Buchanan, of Detroit. Their trip included a stop at the Banff Springs Hotel where the boys stayed until they entrained for Lake Louise.

Traffic earnings of the Canadian railways for July show an aggregate gain of nearly a million dollars as compared with July, 1932, the best showing in many months on similar comparisons. Gross earnings of the Canadian Pacific account for \$473,000 of this gain during the month.

"He got you that time," said Mrs. Montana Norman to the governor of the Bank of England, when they landed recently at Quebec from Canadian Pacific liners, Duchess of Athol, on their way to Bar Harbor, Maine. The purpose of the visit is a mystery, not even a holiday being admitted by the distinguished visitor.

John Nelson, president of Rotary International, sailed recently by Empress of Britain on his way to Lausanne where the second European regional conference of the world-wide organization was held this month. He stated that Rotary had 150,000 members in 594 clubs.

"If from the conferences, speeches and exhibitions at the World's Grain Exhibition at Regina we can derive even one suggestion of importance to agriculturists, the show will be voted a success," said E. S. McElroy, manager, United Grain Growers office in Calgary, in a recent address at the Palliser Hotel in that city.

Auto Accident Deaths Decrease.

Alberta has been experiencing a notable reduction in deaths from auto accidents in the past three years, according to figures just released by the federal bureau of statistics. In 1930 the province had 77 deaths; 1931 67 deaths and 1932 49 deaths. The latter figure compares with 50 in Nova Scotia, 49 in New Brunswick, 42 in Manitoba, 34 in Saskatchewan and 85 in British Columbia. The percentage for Alberta in deaths per 10,000 motor cars registered in 1932 was 5.64, compared with 3.73 in Saskatchewan, 5.87 in Manitoba, 9.34 in British Columbia, 9.32 in Ontario, 18.77 in Quebec, 17.47 in New Brunswick and 12.15 in Nova Scotia. Alberta's percentage of 5.64 compares also with the Canadian percentage of 10.01.

Alberta's Big Butter Year.

The present year gives promise of creating a record for the production of creamery butter in Alberta. The previous record year in the province was 1931, when nearly 23,000,000-lbs were produced. For the first eight months of this year the production has been 18,077,000-lbs., compared with 17,179,700-lbs. for the same period in the record year of 1931. Recently a considerable export of Alberta butter to Old Country markets has been underway, amounting to about 672,000-lbs.

Ryley Cooper Heads Anglers' Club.

Courtney Ryley Cooper, noted author and angler, who comes every year to Alberta fishing grounds to indulge his love of this sport, has been elected president of the Maligna River Anglers' Club, in the Jasper National Park, west of Edmonton. Mr. Cooper was one of the first to fish in Maligna River following the stocking of Maligna Lake and tributaries with trout over a year ago.

South Alta's. Pioneer Wheat Champ.

Since its recovery of the world's wheat championship at the world's grain congress at Regina this summer, when Fredan Wilford, Staveland, won the \$2,000 award for the finest sample of hard red spring wheat among competitors from many countries, Southern Alberta discovered it had a champion 40 years ago, for which historical records have not been published have given little credit. Musty files have been unearthed to reveal the fact that A. M. Morden, pioneer farmer in the Pincher Creek district, 70 miles west of Lethbridge, won awards in wheat, oats and barley at the world's fair at Chicago in 1893. The board of judges awarded this farmer a medal for specific merit as follows—wheat: for very hard grain, pure and of good color, sown April 25th, harvested August 20th, yield 53 1-2 bushels per acre, weight 65 1-2 lbs., no irrigation and grown on fallow land. Oats: sown April 24th, harvested August 12th, yield 85 bushels per acre, weight 49 1-2 lbs. Barley: very fine quality, sown May 5th, harvested August 10th, weight 54-lbs. per bushel, yield 40 bushels per acre, no irrigation. It was at the same international exhibition in 1893 that Rev. A. L. Brick, missionary in the far Peace River country, got a high award for a sample of wheat he exhibited.

Alberta Newspaperman Honored.

Chas. Clarke, who founded the "High River Times" at High River many years ago, was this year elected to the presidency of the Canadian Weekly Newspaper Association at the convention in Vancouver.

Husky and Happy—Oh Boy!

Forty-eight happy boys and girls at the Royal York Hotel, Toronto. They are the lucky winners of the Silver Token Contest sponsored by Croese and Blackwell, well-known manufacturers of food products, and their reward was a two-day visit to the Canadian National Exhibition.

They all travelled Canadian Pacific and the Royal York Hotel was theirs for two full days. There was much entertaining in the various rooms occupied by the youngsters. The contents of a large number of bottles of pop were consumed. Hands were swept over slick heads and ties

were adjusted before entries were made to the dining rooms, and there was much jolly chatter over meals. Thorough tours were made of the big exhibition and for a long time to come these boys and girls will have happy memories of the two exciting and hilarious days.

Feeding of Beef Cattle.

It is expected that some 3,500 head of beef cattle will be fed this winter under the rancher-farmer contract system which is to be continued for its fourth year under the supervision of the provincial department of agriculture. John Wilson, who has been supervising feeding arrangements in the Lethbridge district, has been recognized the department for the work, and his territory is being extended to as far north as Red Deer. Mr. Wilson is now working in the territory between Didsbury and Red Deer, where it is expected a considerable number of cattle from the ranches will be fed this winter.

Alberta's Purebred Cattle.

According to the 1931 census Alberta had a total of 41,310 head of purebred cattle in that year, compared with 40,363 in Saskatchewan; 17,919 in British Columbia, and 23,863 in Manitoba. Alberta was third among all the provinces in this respect and third also in respect of numbers of purebred sheep, being led only by Ontario first and Quebec second.

WORLD HAPPENINGS BRIEFLY TOLD

The "Royal Scot" which has visited Chicago World's Fair, will arrive in Canada at Vancouver. It will start its Dominion tour October 26.

Terms of a Franco-Russian commercial agreement for an interchange of products between the two countries was reported recently, following long negotiations.

Falling asleep in his father's grain field at Carvel, Alta., Mike Shaigee, aged three years, was instantly killed when his father, not noticing the sleeping boy, ran a binder over him.

Archibald C. Manberg, 61, former Canadian lumber trader, commissioner in London, England, and prominent in Canadian lumber circles, died in hospital at Toronto, after a long illness.

The third plane bought by the government of Saskatchewan from the Royal Canadian Air Force this summer has been brought from Ottawa with Flight-Lieutenant F. M. Carter, chief pilot of the Saskatchewan flying service, at the helm. Boys are better mechanics than girls competing at the Canadian National exhibition, Toronto. Five classes—bread, rolls and buns, baking powder biscuits, ginger-bread and cookies—saw boys win nine places and girls eight in the 17 awards.

Moving of freight across Fitzgerald-Fort Smith 16-mile portage by aeroplane now is under way, according to reports received from the north. The freight is placed aboard the planes at Fitzgerald and flown to Fort Smith at the rate of one ton per hour.

Canada's new conversion loan may possibly be launched around Oct. 1 instead of Oct. 15, the date previously under consideration, according to well-informed circles. The success of the Canadian loan in London and the improvement generally in the money market are given as reasons for moving the date ahead.

Prefer Staying On Ship

Fort Of Churchill Has No Attraction For Sailors

While skippers of the deep water vessels who have arrived at Churchill this season say they are delighted with prospects of business in and out of the port, the crews turn a sad eye on the construction camps and the town.

They claim it is the driest of all the 57 varieties of ports they visit in the course of a year or two. Sailors coming ashore, for the most part, play an odd game of English billiards, sip an occasional orangeade, and purchase a few picture post cards of Eskimos.

Then singing for the "wine, women and song" of other harbor-fronts, they crunch their way over the gravel heaps and go aboard their various ships.

Bootblack Left Fortune

Accumulated Large Estate In Last Thirty-Five Years

Pietro A. Ierardi, of Edmonton, who accumulated a fortune shining shoes, left an estate of \$150,815 gross and \$121,091 net, according to a transfer tax appraisal. Ierardi, who died on July 7, 1932, owned the bootblack concession in the Grand Central Terminal in New York for 35 years. A native of Naples, he came to America when he was 15 years old and started his career as a bootblack on the streets. Only \$17 of his estate was in stocks and bonds. He had \$98,500 in New York and Westchester real estate, 11 bank accounts totaling \$21,000 and mortgages totaling \$7,280.

New Trade Envoy

A new trade commissioner is to be appointed to represent Canada in Britain, it has been announced at Ottawa. His special duties will be to develop trade in Canadian fruit in the United Kingdom and he will receive an initial salary of \$4,500 and full living allowance. The department of trade and commerce expects to secure an expert in Canadian fruit growing for the position.

Vacuum cleaners are replacing the bucket and mop as domestic cleaners of British war vessels.

W. N. U. 2019

Gas From Coal

Huge Industry Being Established, An Industry Which Will Furnish Much Employment

One of the most striking of all the developments that have recently taken place in Great Britain is that of the production of petrol from coal. A week or so ago Prime Minister Ramsay MacDonald announced in the House of Commons that it had been decided to place a preference of preference a gallon on petrol so produced, and this was immediately followed by the public statement of the Imperial Chemical Industries that the construction of a plant to cost \$35,000,000 at Billingham-on-Tees would be proceeded with at once.

This plant will produce 70,000,000 gallons of petrol a year. It will provide employment for 2,000 workers, and will absorb the mine production of three thousand miners, that is \$50,000 tons of coal a year.

Another plant is to be erected, probably at Doncaster which will give 20,000,000 gallons, giving work to 10,000 miners, and other plants are to be built throughout the coalfields including South Wales, Northumberland, Lancashire, Forest and Dean and possibly Kent. As soon as construction begins, work for 7,000 will be provided, it is estimated. Further the iron and steel industries will be immensely stimulated and seven thousand more men will be required in the near future.

For years scientists have been engaged in endeavoring to perfect the process of obtaining petrol from coal. It has now reached the commercial stage and it is reckoned that a high quality coal can be produced for seven pence per gallon. But the preliminary experiments have been costly, the expenditures on them being estimated at \$250,000,000.

This great new industry is proving a veritable stimulus to Great Britain in its efforts to establish trade recovery. The benefits that will be derived from it by the coal industry and others are hardly to be imagined. To the coal miners, who have been such heavy sufferers by the decline in trade, it will be a godsend—Regina Daily Star.

Recipes For This Week

(By Betty Barclay)

PARSNIP SOUFFLE

Boil four medium-size parsnips in boiling water until tender. Remove skins and rub through a colander. Mix together one teaspoon salt, one-eighth teaspoon pepper, one teaspoon sugar. Add to the parsnips, together with one tablespoon butter. Melt two tablespoons of butter in a saucepan, stirring in two tablespoons flour and one cup milk. When the mixture is thick and smooth add to the parsnips. Together with the yolks of two well-beaten eggs. Beat the white of the eggs until stiff and fold into the mixture. Place in a well-buttered baking dish and bake for 25 minutes in a moderate oven. Remove and serve immediately.

BLUEBERRY AND APPLE CONSERVE

2 cups blueberries.
2 cups tart apples, diced.
3 cups sugar.
Juice of 1 lemon, grated.
Kind of one-half lemon.
Combine all the ingredients except the nut meats. Cook until the mixture is thick and clear. Add the nut meats just before taking from the fire. Pour into hot, clean glasses. Seal tight.

Trying Out New Method

An electric "anesthetic" is being tried out in the slaughter house at Milan, Italy. The animal to be killed is subjected to a 25-volt current, which is said to make him impossible to pain for a time long enough to permit the scientific slaughter. Until it can be fully determined whether the electricity has a harmful effect on the meat, the new system will remain in experimental stage. Technical reasons forbid use of a current strong enough to produce instant death.

Artificially dried hay contains practically 100 per cent. of the nutrient value of the original grass, vitamins included, and cows fed on it produce milk and cream of the same quality as produced when they are eating summer grass.

Winnipeg Newspaper Union

By Ruth Rogers

SNAPPY, WEARABLE AND CHIC AND IT'S SO EASILY MADE

Develop this modish dress in thin plain rough woolen weave in grey, topped by a tweedy striped grey woolen. You'll love it because it has so much dash and chic.

Plain printed silks are also suitable.

It is lovely in grey crinkly crepe silk with short puffed sleeves as in the small view.

Style No. 680 is designed in sizes 14, 16, 18, 20 years, 36, 38 and 40 inches bust.

Size 16 requires 2 1/2 yards of 35-inch material for skirt and collar with 1 1/2 yards of 35-inch material for waist.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Destroying Flower Bulls

Holland Finds They Are Drug On Market At Present

A bulb-destroying work has been held in the Haarlem district particularly and in Holland generally. The object is the same as that of the Brazilians in burning their coffee: to reduce the supply and increase prices. The famous Dutch bulbs, once the pride of the nation, are now a drug on the market, after having made fortunes for many growers. In the Haarlem region they were brought in in caravans and thrown into garbage cans and refuse piles. Hundreds of thousands of tulips, hyacinths and narcissuses were destroyed in this manner. Destruction week was "decreed" by the "adjustment committee for rehabilitation of the industry."

Railway Accidents In Canada

A total of 152 railway accidents, with 16 persons killed and 167 injured occurred during the month of June in Canada, according to a statement issued by the board of railway commissioners. Out of the 152 accidents 15 took place at highway crossings, 11 occurring at unprotected crossings. Ontario led the provinces with seven highway crossing accidents.

One ounce of tungsten is used to make 17.7 miles of wire, three tenths of an inch thick, for three-watt electric lamps.

Biologist Speaks On Heredity

Education Is Also Needed To Produce Brilliant Men

The children of brilliant parents will never be as brilliant as their parents, but they will be above the average," said Dr. Ward Cutler, the biologist, at the British Social Hygiene Council summer school at Oxford.

"Similarly, except in the case of feeble-mindedness, the children of low-grade parents will not be quite as low-grade as their parents, but they will be well below the average of the country.

"I do not believe that education will ever produce a great scientist, historian, or literary man, unless the necessary characteristics are born in him.

"Nor do I believe that heredity can ever produce any of these men without the right environment and education."

"Plenty of love and cod liver oil," was urged by Hon. Mrs. E. Franklin, as a better dictum than much of so-called "modern" training of children, at the World Federation of Education Associations in Dublin.

"With all our scientific planning," she said, "the child's heart still leaps when he beholds a rainbow in the sky. But this part of the child is often starved."

Use Of Tomato Juice

Takes The Place Of Oranges And Aids Home Industry

Sidelings upon the battle waged between orange and tomato growers came up for discussion in an educational round-table conference at the Institute of Pacific Relations at Banff.

A Canadian woman delegate from Ontario pointed out the growth of physical education and its stress upon sound dietetics, recalling the sudden burst of propaganda and education in favor of oranges which greatly expanded the sale and consumption of California fruit. This, so far as Canada was concerned, meant the import of oranges.

It was not long, she said, before equally heavy pressure developed for the use of tomato juice as a substitute for orange juice; and educationalists were told the home-grown tomato was not only as sound a food as the orange, but had the added advantage of encouraging home industry.

Symbol Of Friendship

Canadian Institute Of International Affairs Receives Picture From Japan

Symbol of Japanese friendship toward Canada, a handsome picture by a noted Japanese artist has been presented to the Canadian Institute of International Affairs by the Japanese group attending the Pacific Relations Conference. The picture was presented to the Canadian group by Dr. Inazo Nitobe, leader of the Japanese group and accepted by E. J. Tarr, Winnipeg, Sir Robert Falconer, Toronto, and W. M. Birks, Montreal.

The handsome-framed picture is about 3 1/2 feet by 3 feet in size and done in silk which, it is said, will endure almost 1,000 years. The painting was done by Junjo Araki, one of Japan's great artists, especially as a gift to Canada.

If Conference Fails

Race For Air Armaments Would Result, Opinion Of London Paper

Great Britain will build 100 fighting airplanes, the fastest and most efficient in the world, and a new force of seaplanes, if the Disarmament Conference fails, the London Daily Herald asserted and forecast that disarmament failure would precipitate a race for air armaments.

The new airplanes, the newspaper said, would cost \$2,500,000 and would be equipped with late model machine guns and motors such as those with which Britain has won recent Schneider Cup speed races, capable of more than 250 miles an hour.

Many Apply For Job

Advertising for a girl to assist in his St. Catherine St. office, salary seven dollars a week, John H. Baxter, contractor of Montreal, received 460 replies from men and women. Applicants included former office and factory girls, members of the architectural and legal professions and graduates of the faculties of arts, science and engineering of McGill and Toronto Universities.

Linking World By 'Phone

Faraday Building In London Will Serve Over 32,000,000 Subscribers

Faraday building, in the city of London, is to be the centre of a gigantic spider's web of world-wide communications, equipped to serve over 32,000,000 telephone subscribers.

When completed, its 11 spacious storeys, covering a superficial floor area of 109,000 square feet, will be the most scientifically controlled building in Europe.

Many scientific devices to assist the operators and safeguard subscribers have been added. These include:

Special automatic timing apparatus which checks conversation periods on the continental and inland trunk services to a fraction of a second.

Two stop-watches attached to the exchange panels used for radio telephone check calls to one-fifth of a second.

White and green lamps signify to the operator, by pressing a button, the state of traffic at the continental exchange. This saves time by advising subscribers of the length of delay.

Small spot light systems reveal sole circuits associated with outgoing radio telephone or inland trunks.

Revolutionary changes are to be made in certain services to bring them up to date.

Chief among these will be the extension in the autumn of the "service on demand" to practically the whole of the inland long distance routes from London.

Services to be housed at Faraday house will include: A new toll exchange to serve 1,000,000 subscribers in and around London; city and central exchanges to be transferred from Carter Lane; and the international switchboard at Carter Lane to be enlarged.

Secret Is Valuable

How Soft-Mouthed Creatures Tunnel Hardest Wood Problem For Scientists

The following article by W. Beach Thomas, appeared in the London Spectator:

Will our men of science who concern themselves with natural history settle the following point? How do caterpillars and other rather soft-mouthed creatures tunnel the hardest wood? Is their secret mechanical or chemical? I saw this week a hole of singularly hard English oak of considerable age converted almost into a comb by the caterpillars of the Great Hawk moth. The beast is large and powerful and of that warning yellow coloration which suggests venom. But the tissue even of the mouth is soft, and a priori, it looks impossible that it should be able to gnaw a substance which turns hard iron nails. It is a natural inference that the caterpillar ejects some chemical to help it. If so, it might be of no little importance to discover exactly what is this wonderful stuff which may make vegetables soft and palatable. Did not Mr. Haldane prognosticate this feat as one of the final revolutionary developments of the future.

Lens Made In Layers

British Opticians Have Perfected Unbreakable Glass For Spectacles

The great fear of spectacles being broken while worn and causing serious injury to the wearer is to be removed following long research by British opticians.

A lens made in layers, which said the manufacturer to a newspaper representative, did not break when hit with a hammer, has been perfected.

It was tested for 500 hours with ultra-violet rays; boiled up to 500 degrees Fahrenheit, and baked in an oven.

After that it was frozen in a refrigerator.

Howards Not So Hearty

Reading that when Henry Travis of Pullman, Wash., won a local "stomach" contest, fellow grain growers presented him with three gallons of ice cream. Junior is inclined to think that the results of agriculture are not so meagre as are recently have been pictured.

Aberdeen, Scotland, faces a water shortage.

OCCASIONAL WIFE

by EDNA ROBB WEBSTER

Author of "Joretta," "Lipstick Girl" Etc.

SYNOPSIS

Camilla Hoyt, young and beautiful, falls in love with Peter Anson, fellow student in an art school. She is the adopted daughter of a wealthy family, and he is a poor, struggling sculptor. On their first date, Peter spends most of his money to show Camilla a good time, and then decides he must give her up because he cannot stand the financial pace. A chance meeting, however, proves the way for another date. This time they walk in the park.

(Now Go On With The Story.)

CHAPTER VII

"You think I am going to art school for the novelty of having something to do," Camilla began, as they walked through the park, "and that I haven't a serious thought in my head. You think I am a girl with a fortune and not an idea of earning a penny of my own. That's the girl you think I am. But you're wrong. My classes at National are only a part of my training to become a commercial artist. That means I want to work, and have to work. I'm not dabbling with art for a pastime, as you have been thinking. What's more, I'm not even planning for a distant future with the possibility of success as a famous artist, who creates beautiful and lasting things. I intend to commercialize whatever talent I have just as soon as possible. Covers for magazines that will be glanced at and tossed aside, illustrations for stories that will be read and forgotten, fashions that are whims for a day, playing advertisements for linoleum, tooth paste and whatnot. In fact, I'll do anything I have a chance to try. Now you know." She stopped abruptly and the soft silence of the night closed in about them isolating them.

Finally Peter said, "Know what? I'm glad to know that you are ambitious to do something for yourself, and all that, but what's that got to do with—with my forgetting you and your being blue?"

"Because I'm just a poor little rich girl who has to earn my own living after the first of September, next." Peter was puzzled. "But you are the Hoyt girl, aren't you? I supposed you were only dabbling in art for amusement. Are you really serious?"

"Just as serious as my situation. I really am a little frightened, Mr. Anson—about earning my living, I mean. Sometimes I get to wondering how I could be of any service that would be worth money to people."

"But your fortune—"

"I have no fortune. And my name is not Hoyt, really."

He shook his head in bewilderment. "I'm still floundering."

"I don't mind telling you all about it, if you still care to listen."

"I'm very anxious to know."

Camilla turned on the bench facing him, and began earnestly, like a child reciting a story. "To begin at the beginning, I am one of a family of nine children—the middle one. My real name is Lorenz. But I didn't know that until three years ago, when I had been riding in the clouds for fourteen years and suddenly had to come down to earth in a parachute. I almost got tangled up in the strings and things, but I finally landed feet first and looked around to

★ ★ AN EASY WAY OUT OF A MEAN JOB ★ ★

Stains flush off with Gillett's Lye . . .

ONCE a week just pour Gillett's Lye—full strength—down your toilet bowls and drains. It removes all stubborn stains without hard scrubbing and rubbing. Cannot harm enamel, is non-injurious to plumbing. Kills germs and banishes odors, too.

Keep a solution of Gillett's Pure Flake Lye on hand for all your household cleaning. One teaspoonful dissolved in a quart of cold water

makes a safe, economical cleanser. Use it for greasy pots and pans, the kitchen floor, sinks and bathtubs.

And be sure to get the genuine Gillett's Pure Flake Lye. Order a tin today. Ask for it by name at your grocer's.

GILLETT'S LYE

Free Booklet

The Gillett's Lye Booklet tells you how to avoid drudgery by using this powerful cleanser and disinfectant for dozens of heavy duty jobs.

Also contains full directions for soap making, disinfecting and other uses on the farm. Ask for free copy, Standard Brands Limited, Fraser Avenue & Liberty Street, Toronto, Ontario.

*Never dissolve lye in hot water. The action of the lye is swift on the water.

EATS DIRT

Little Helps For This Week

"They go from strength to strength."—Psalm 74:7.

"First the blade, then the ear, then the full corn in the ear."—Mark 4:28.

Build the more stately mansions of your soul.

As the swift seasons roll; Leave thy low-voiced psalm; Let each new temple nobler than the last.

Shut thee from heaven with a dome more vast.

Till thou at length art free. Leaving this outgrown shell by life's untrusting sea.

—O. W. Holmes.

High hearts are not long without hearing some new call, some distant clamor of God, even in their dreams, and soon they are observed to break up their camp of ease and start on some new fresh march of faithful service. And looking higher still we find those who never wait until their moral war accumulates who do the good only to see the better, and see the better only to achieve it, who are faithful for remorse, too earnest for repose, whose worship is action, and whose action is ceaseless aspiration. —J. Martineau.

Chinese Trainmen Executed

Three trainmen whose alleged carelessness resulted in a wreck between Kinkiang and Nanchang that caused between 30 and 50 persons to be killed or hurt were executed by Chinese authorities. The wreck occurred when the train jumped the track. Of the 500 passengers, 200 were military cadets.

RHEUMATISM GOT HIM

80-years-old Pianist is Relieved by Kruschen

Although old age has not yet kept this man from his occupation as a pianist, rheumatism did threaten to do so recently.

"Two years ago," he writes, "I was suddenly taken with rheumatism, all down my left arm. I tried many things all to no purpose. I then commenced taking a half-teaspoonful of Kruschen Salts every morning, and soon felt benefit. My arm, which was painful and nearly useless, to my astonishment is now, after a few weeks, as good as better. I am more than pleased, as I am a pianist, and playing made matters worse. I am 80 years of age, my son, young, and am in good health."—G.L.A.

The six mineral salts of Kruschen have a direct effect upon the whole bloodstream, neutralizing uric acid, which is the recognized cause of rheumatism. They also restore the eliminating organs to proper working order, and so prevent constipation, thereby checking the further formation of uric acid and other body poisons which undermine the health.

"The Blues Are All Gone."

on half rations most of the time, and the wealthy Mrs. Hoyt never having known how soup was made she could do that. Anyway, it seems that I was quite a pretty child—in fact, a beautiful child."

"I don't doubt that," he interrupted again.

Camilla dismissed that with a gesture of impatience, "—and the rich lady who had no children of her own was so captivated by me that she came to see me again and wanted to take me home. The attraction was mutual. I liked the grand lady and wanted to go home with her when she suggested it. My parents objected at first, but she finally persuaded them to agree. It was my mother who did the objecting, it being my father's policy that there were plenty more where I came from and he already had more mouths than he could feed, anyway. Mrs. Hoyt was to adopt me until I became of age. She promised to do everything for me that money could do: private schools, social advantages, travel and special education. I would be her daughter until I was twenty-one. Then I should decide for myself what

debate. Soon afterward, I learned the facts. Naturally, it was a shock. Then I learned that my foster mother was ambitious for me to marry wealthy, which would solve my problem very nicely. Prospects were offered to me continually, always with the deceitful ruse that I was the Hoyt heiress. To double the attraction. Foreign titles, industrial fortunes, social honors. I despised it all. At first, I announced that I would leave them and be independent. But I learned that it was legally arranged for me to live as Camilla Hoyt until I was twenty-one. So I decided to make the best

When Your Daughter Comes to Womanhood Give Her Lydia E. Pinkham's Vegetable Compound

Most girls in their teens need a tonic and regulator. Give your daughter Lydia E. Pinkham's Vegetable Compound for the next few months. Teach her how to guard her health at this critical time. When she is a happy, healthy wife and mother she will thank you.

THE RHYMING OPTIMIST

By Aline Michaels

WITHIN THE DREAM

In truth, I know I cannot mold Life's ways to my desire; But could you know the hopes I hold, My vision's flower and fire!

Could you not glimpse the loveliness Which is my goal and guide, Like shine and sheen of April's dress, And like sunset on the tide?

You, too, would then forget the care, The burden of the day, Could you in this rich dower share Of glory's hidden way?

The world, perhaps, must laugh at me, The dreamer passing by, With spirit drenched in ecstasy And rapt, unseeing eye.

But though I know I cannot mold Earth's ways to my desire, I dwell within the dreams I hold, My vision's flower and fire!

In Italy silk is now used for the covering of sausage. What is used for the inside remains as ever a mystery.

Thanksgiving Day.

Monday, Oct. 9th has been proclaimed Thanksgiving Day. Armistice Day, Nov. 11th, has also been declared a public holiday.

Obituary.

JOHN BRADO.

The funeral service for Mr. John Brado, who died at the home of his daughter, Mrs. W. H. Snyder on Thursday, September 21st, 1933, was held at the M.B.C. Church on Saturday last. Rev. A. Traub, assisted by Rev. V. K. Snyder, conducted the service.

John Brado was born near Kitchener, Ont. on July 13th, 1857. On November 7th, 1882 he was married to Katherine Teasdale, and one daughter was born to this union.

In 1899 he moved to Alberta and settled east of Didsbury. For the last number of years he made his home with his daughter Mrs. W. H. Snyder.

Deceased was among the earlier settlers in this district and was always highly respected by his friends and neighbors.

Mr. Brado was predeceased by his wife and is survived by his only daughter, Mrs. W. H. Snyder, 15 grandchildren and 2 great grandchildren, also two brothers, Manuel, of Didsbury, and William, of Oshawa, Ont., who, together with a large circle of friends mourn his loss.

Burnside Notes.

Lone Pine W.I. meets at the home of Mrs. Bert Press on Thursday, October 12th.

Miss Tena McLean is visiting at her home here.

Mr. Bob McCulloch is assisting at the Alberta-Pacific elevator in Didsbury.

Mr. Abe Neufeld had the misfortune to break his right arm when cranking a Ford car while threshing in this district last week.

The many friends of Mr. Sam McAllister will be pleased to hear that he is on the mend after his recent severe illness.

Esther Dyck, daughter of Mr. and Mrs. A. B. Dyck, who has been very ill, is reported to be improving.

WEEKLY SERMONETTE

"Remember the week day—to keep it holy."

WEEKLY JOKE

A drummer in the soap line was relating how, at a beach, he saw a bathing girl being carried away by the surf:

"Of course, you plunged in and saved her?" said a listener.

"No, I couldn't swim, but with quick thought I opened my sample case and threw her a cake of our famous soap!"

"What was that for?" several asked.

"To wash her back," came the calm reply.

CARD OF THANKS

We wish to thank the many friends and neighbors for the kindness and sympathy shown during our recent bereavement, and for the floral tributes.

Agnes and Victor Pear.

For Sale—The following Used Cars and Trucks, all thoroughly reconditioned: 1931 Ford coupe; 1930 Ford sport coupe; 2 1930 coaches; 1930 Nash; 1929 Chev. sedan; 1931 Ford truck; 1929 Ford truck; 1928 Ford truck; 1929 Chev. truck; 1926 Chev. truck. These cars and trucks are all in good condition and ready for the road. They are priced to sell. I will accept livestock as full or part payment. Also 2 good 28" Threshing Outfits For Sale (separators and tractors). The oldest established Ford dealer in Alberta. Leslie Farr, phone 21 Airdrie.
